DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 9 is rejected under 35 U.S.C. 102(e) as being anticipated by Nagata et al (USPN 6,585,366).

With respect to claim 9, Nagata discloses a laminating device (figure 1) comprising a media path, a laminating nip (element 8) arranged along the media path for laminating a media (element 5), a pair of drive rollers arranged in the media path for driving the media, and a motorized media supporting roller arranged at one end of the media path for holding media, wherein the laminating nip is arranged along the media path between the pair of drive roller and the motorized media supporting roller (see figure below).

Allowable Subject Matter

2. Claims 1-7 and 10-14 are allowed.

Response to Arguments

3. Applicant's arguments filed 10/4/04 have been fully considered but they are not persuasive.

Applicant's argument that the roller 9 of Nagata does not provide for bi-directional media movement is not persuasive because nothing in the claim 9 recites this feature.

Applicant's argument that Nagata does not disclose "a motorized media supporting roller" is not persuasive because refer to figure 1, the recording medium (5) is support and feed by the roller (show in figure 1 above). Therefore, Nagata meets the limitation of the claim.

Art Unit: 2853

Note: the motorized media supporting roller is not roller 9, see figure 1 above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
